RDG100T/H

# Wall-mounted room thermostats with LCD

### **RDG1..**

for fan coil unit applications

for universal applications

for use with compressors in DX-type equipment

- RDG100..: Operating voltage AC 230 V, On/Off, 3-positon or PWM control outputs
- RDG110: Operating voltage AC 230 V, On/Off relay (SPDT) outputs
- RDG110U: Operating voltage AC/DC 24 V, On/Off relay (SPDT) outputs
- RDG100../RDG110..: Output for 1-speed and 3-speed
- RDG160T..: Operating voltage AC/DC 24 V, DC 0...10 V or On/Off control outputs
- RDG160T..: Output for 1-speed, 3-speed or ECM fan DC 0...10 V
- Operating modes: Comfort, Economy and Protection
- Automatic or manual fan speed
- 3 multifunctional inputs for keycard contact, external sensor, etc
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Backlit display

Additional features of RDG100T, RDG160T.., RDG100T/H:

- Infrared remote control receiver
- Auto Timer mode with 8 programmable timers
- Auto timer can be disabled via P02
- Auto timer can be disabled via DIP switches (RDG160T..)
- Landscape design (RDG100T/H only)
- Selectable relay output functions (RDG160T..)

The RDG1.. room thermostats are designed for use with the following types of system:

Fan coil units via On/Off or modulating control outputs:

- 2-pipe system
- 2-pipe system with electric heater
- 2-pipe system and radiator/floor heating
- 4-pipe system
- 4-pipe system with electric heater
- 2-stage heating or cooling system

#### Chilled/heated ceilings (or radiators) via On/Off or modulating control outputs:

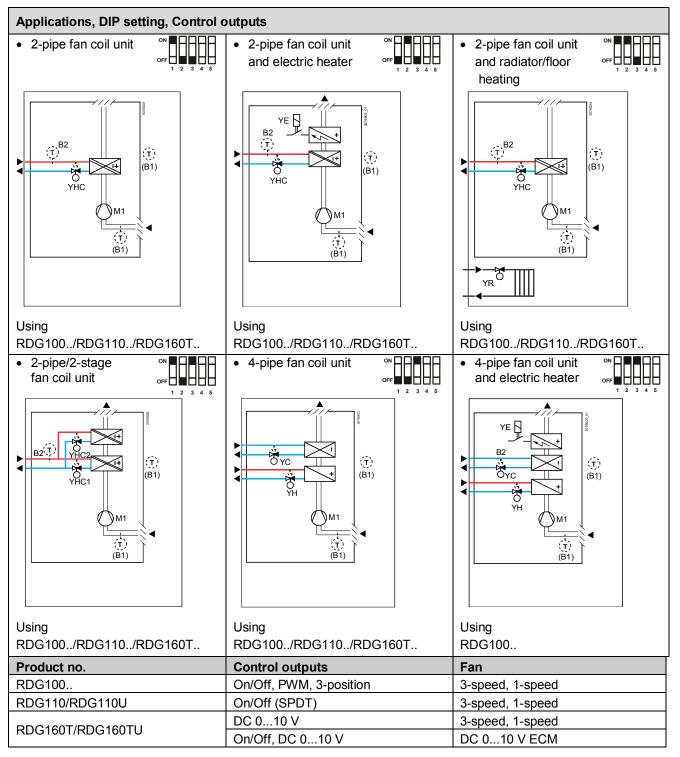

- · Chilled/heated ceiling
- · Chilled/heated ceiling with electric heater
- Chilled/heated ceiling and radiator/floor heating
- · Chilled/heated ceiling, 2-stage cooling or heating

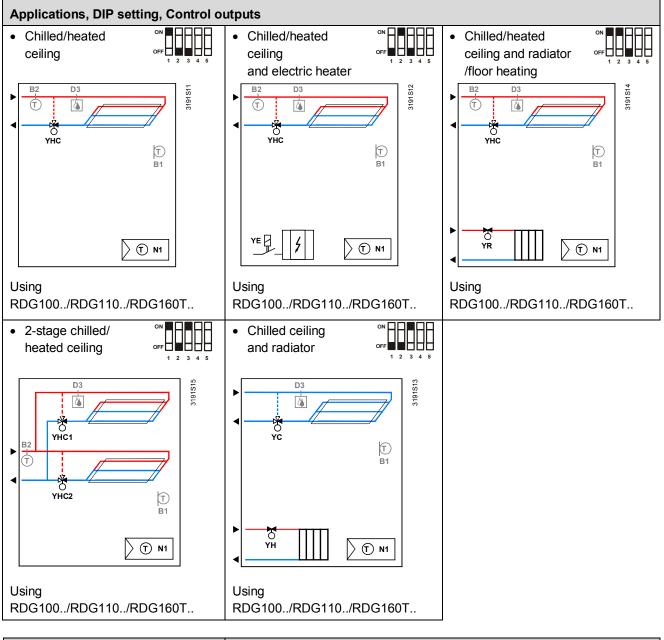

#### Heat pumps with dx-type equipment:

- 1-stage compressor for heating or cooling
- 1-stage compressor for heating or cooling with electric heater
- 1-stage compressor for heating or cooling and radiator/floor heating
- 1-stage compressor for heating and cooling
- 1-stage compressor for heating and cooling with reversing valve
- 2-stage compressor for heating or cooling

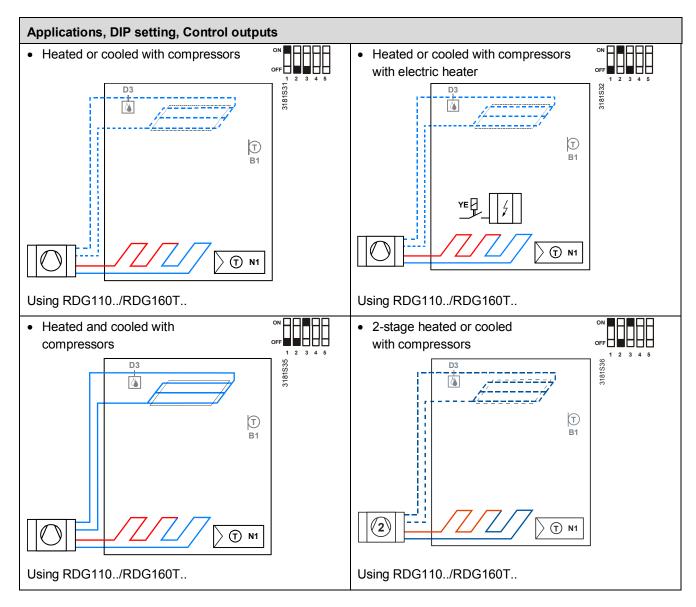

- Maintenance of room temperature via built-in temperature sensor or external room temperature/return air temperature sensor
- Automatic or manual changeover between heating and cooling mode
- Selection of applications via DIP switches
- Selection of operating mode via the operating mode button on the thermostat
- 1-speed, 3-speed or DC 0...10 V fan control (automatic or manual)
- Display of current room temperature or setpoint in °C and/or °F
- Minimum and maximum setpoint limitation
- Button lock (automatic or manual)
- 1 digital input, freely selectable for:
  - Operating mode switchover contact (keycard)
  - Automatic heating/cooling changeover contact
  - Electric heater enable
  - Dewpoint sensor
  - Fault input
- 2 multifunctional inputs, freely selectable for:
  - Operating mode switchover contact (keycard)
  - Automatic heating/cooling changeover sensor
  - External room temperature or return air temperature
  - Dewpoint sensor
  - Electric heater enable
  - Fault input
  - Supply air temperature sensor (RDG160T..)
- Advanced fan control function, i.e. fan kick, fan start, selectable fan operation (enable, disable or depending on heating or cooling mode)
- Purge function together with 2-port valve in a 2-pipe changeover system
- Reminder to clean filters
- Floor heating temperature limit
- Minimum and maximum supply air temperature limitation (RDG160T..)
- Reloading factory settings for commissioning and control parameters
- 7-day time program: 8 programmable timers to switch over between Comfort and Economy mode (RDG100T, RDG160T.., RDG100T/H)
- Infrared remote control (RDG100T, RDG160T.., RDG100T/H)
- Selectable relay function (RDG160T..)
  - For switching OFF external equipment OFF during Protection mode
  - For switching ON external equipment (such as. pump) during H/C demand
  - Output heating/cooling sequence
- Wizard function to select working temperature unit °C or °F (RDG160TU, RDG110U)

The room thermostats support the following applications, which can be configured via DIP switches at the rear of the unit. Depending on the thermostat type, On/Off or modulating control outputs are available.

| Product no.      | Control outputs         |
|------------------|-------------------------|
| RDG100           | On/Off, PWM, 3-position |
| RDG110/RDG110U   | On/Off (SPDT)           |
| RDG160T/RDG160TU | On/Off, DC 010 V        |

| Product I | no.       |      | Control outputs                     | Fan      |  |

1) Infrared remote control must be ordered as a separate item

2) ECM fan output DC 0...10 V

3) On/Off, PWM or 3-position (triac outputs)

4) Relay output (SPDT)

5) Can be disabled via P02 (or via DIP switches on RDG160T..)

6) On/Off (relay output) or DC control signal

#### **Equipment combinations**

- 4 ST..23.. if used with On/Off control signal
- 10 SFA.., SUA.., MVI.., MXI.. On/Off actuators
- Parallel operation of SQS35 is not available

Maximum number of actuators in parallel on the RDG110..:

• 10 On/Off actuators

Maximum number of actuators in parallel on the RDG160T...:

- 10 SS..61.. actuators (DC)
- 10 ST..23/63/73.. actuators (DC or On/Off)
- 10 SFA.., SUA.., MVI.., MXI.. On/Off actuators
- 10 SQS65.. actuators (DC)

| RDG100T/H   | S55770-T235 | Room thermostat, with timer, landscape housing   |
| RDG110      | S55770-T160 | Room thermostat with relay outputs (AC 230 V)  |
| RDG110U     | S55770-T361 | Room thermostat with relay outputs (AC 24 V), UL certified                                     |
| RDG160T     | S55770-T343 | Room thermostat with timer and DC (or On/Off) output for valve and fan (AC 24 V)               |
| RDG160TU    | S55770-T362 | Room thermostat with timer and DC (or On/Off) output for valve and fan (AC 24 V), UL certified |

Order the **IRA211** infrared remote control separately.

Order valve actuators separately.

Order RDG110U and RDG160TU from BT US.

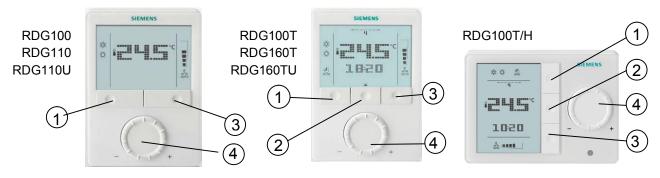

#### Mechanical design

The room thermostat consists of two parts:

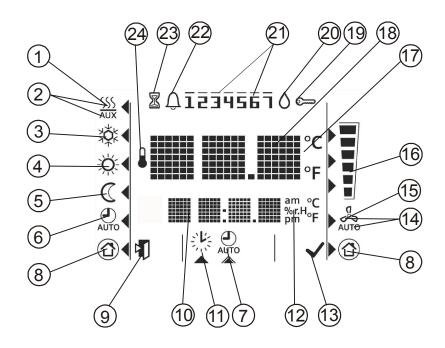

- Plastic housing which accommodates the electronics, the operating elements and the room temperature sensor
- Mounting plate with the screw terminals

The housing engages in the mounting plate and is secured with 2 screws.

#### **Operation and settings**

- 1 Operating mode selector/Esc
- 2 Button to enter the time and to set the timers
- 3 Fan mode selector/OK
- 4 Rotary knob for setpoint and parameter adjustment

| sources, or exposed to direct solar radiation. Mount about 1.5 m (5 feet) above the   |   |
|---|---|
| floor.  |   |
|   |   |
| Table 2   |   |
| • The room thermostat must be mounted in a clean, dry indoor place and must not be exposed to drip or splash water.   | ÷ |
| See Mounting Instructions (M3181, M3183, M3183.1 or M3183.2) enclosed with the thermostat.  |   |
| Comply with local regulations to wire, protect and earth the thermostat.  |   |
| <ul> <li>No internal line protection for supply lines to external consumers (Q1, Q2, Q3, Y or Yxx).</li> <li>Risk of fire and injury due to short-circuits!</li> <li>Adapt the line diameters as per local regulations to the rated value of the installed overcurrent protection device.</li> <li>The AC 230 V mains or AC 24 V supply line must have a circuit breaker with a rate current of no more than 10 A. For AC 24 V US installations, use Class 2 rated power supplies.</li> </ul>   | d |
| <ul> <li>Properly size the cables to the thermostat, fan and valve actuators for AC 230 V mains voltage.</li> <li>Use only valve actuators rated for AC 230 V on RDG100, RDG110 and on RDG160T if AC 230V is connected to the "L" terminal.</li> <li>Use only 3-speed fan rated with AC 24 V on RDG160TU.</li> <li>Isolate the cables of inputs X1-M/X2-M and D1-GND if the conduit box carries AC 230 V mains voltage.</li> <li>On the RDG100 and RDG110, inputs X1-M and X2-M carry mains potential. If the sensor's cables are extended, they must be suited for mains voltage.</li> <li>Inputs X1-M, X2-M or D1-GND of different units (e.g. summer/winter switch) may be connected in parallel with an external switch. Consider overall maximum contact sensing current for switch rating.</li> </ul> | 0 |
| • Selectable relay function (RDG160T). Consider overall maximum current though the relays.  |   |

Do not mount on a wall in niches or bookshelves, behind curtains, above or near heat

• Disconnect power supply before removing the thermostat from the mounting plate!

| Commissioning   | <ol> <li>Select the application via the DIP switches at the rear of thermostat before fitting<br/>the front housing to the mounting plate.</li> <li>Power up the thermostat after successfully connecting the line power. The<br/>thermostat starts to reset and all LCD segments flash, indicating that the reset was<br/>correct.</li> <li>After the reset, which takes about 3 seconds, the thermostat is ready for commissioning<br/>by qualified HVAC staff. The control parameters of the thermostat can be set to ensure<br/>optimum performance of the entire system (see Basic Documentation P3181).</li> </ol> |
|---|--|
| Temperature unit<br>selection wizard (only<br>for RDG110U and<br>RDG160TU)<br>Notes | <ul> <li>The temperature unit selection wizard enables to select the preferable temperature unit display on thermostat between °C and °F.</li> <li>1. Rotate rotary knob to select the preferable temperature unit.</li> <li>2. Press the button ✓ (OK) to confirm the selection, and the thermostat goes to normal operating page.</li> <li>Pressing button <sup>1</sup> (Esc) does not confirm the temperature unit selection.</li> <li>If the temperature unit is not selected, °C is used by default.</li> </ul>   |
| Control sequence  | <ul> <li>The control sequence may need to be set via parameter P01 depending on the<br/>application. The factory setting for the 2-pipe application is "Cooling only"; and<br/>"Heating and cooling" for the 4-pipe application.</li> </ul>  |
| Compressor-based application  | <ul> <li>When the thermostat is used in connection with a compressor, the minimum output on-time (parameter P48) and off-time (parameter P49) for Y11/Y21 (RDG110) must be adjusted to avoid damage to the compressor and shortening its life.</li> <li>Recalibrate the temperature sensor via parameter P05 if the room temperature displays on the thermostat does not match the room temperature measured.</li> </ul>   |
| Adaptive temperature compensation for el. heating                                   | <ul> <li>If an electric heater is directly connected to output Y21, the load current of the<br/>electric heater should be indicated in parameter P46. (RDG110, Index D and higher<br/>only). Default setting: 1 A for loads up to 1 A.</li> </ul>  |
| Setpoint and setpoint range limitation  | • We recommend to review the setpoints and setpoint ranges (parameters P08P12) and change them as needed to achieve maximum comfort and save energy.   |

#### Disposal

The devices are considered electronics devices for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic waste.

- Dispose of the device via the channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
